

2024 PRODUCT LINEUP

AT BERGARA, WE BELIEVE THAT A PRECISION FIREARM REQUIRES THE BEST COMPONENTS AND AN ASSEMBLY PROCESS CARRIED OUT BY INDIVIDUALS WHO ARE THE BEST OF THE BEST AT THEIR CRAFT. WE'VE BUILT A TEAM OF THE WORLD'S MOST TALENTED AND EXPERIENCED FIREARM BUILDERS – FIRST IN THE USA FOR OUR PREMIER SERIES, AND NOW IN SPAIN FOR OUR B-14 SERIES. THE RESULTS ARE EXTREME PRIDE IN BUILDING, AND EXTREME PRIDE IN OWNERSHIP.

A HISTORY OF PRECISION

IT ALL BEGAN SEVERAL YEARS AGO WITH A SMALL LINE OF CUSTOM RIFLES AND ONE TOP-NOTCH CRAFTSMAN, THE FORMER PRODUCTION CHIEF AND CHIEF INSTRUCTOR FOR THE UNITED STATES MARINE CORPS PRECISION WEAPONS SECTION.

As Bergara rapidly grew, we then assembled a hand-picked group.

With the most technically-advanced barrel manufacturing techniques, state-of-the-art machinery, and an unwavering commitment to quality, Bergara Barrels has become the barrel source of numerous top-tier gun manufacturers in both Europe and the United States. Bergara is producing a full line of precision firearms engineered and built to showcase the performance capabilities of our world-class barrels.

Today, these individuals form the core of our production team. They pass on their knowledge and expertise to every new employee, thereby bringing their own real world experience and expertise to every Bergara firearm.

MADE IN OUR FACILITIES

TO PERFORM IN THE FIELD

**EVERY RIFLE STARTS
WITH A PRECISION BARREL**

STEP 1 BARREL STRAIGHTENING

Each Bergara barrel must begin with a straight bar of cylindrical steel. We inspect every bar to ensure it meets our deviation standards.

STEP 2 DEEP HOLE DRILLING

The bar then moves on to a four spindle deep hole drilling machine where a perfect hole is drilled through the entire length of the bar.

STEP 3 BARREL HONING

Three separate honing spindles utilize diamond tipped bits that polish the interior surface of the barrel to a mirror-like finish.

STEP 4 BUTTON RIFLING

A carbide rifling button is drawn through the barrel to produce the rifling grooves at the appropriate twist rate for each caliber. It's the same result that many gunsmiths accomplish by hand lapping.

STEP 5 STRESS RELIEVING

A high temperature heating process realigns the steel molecules ensuring the barrel is free from any stress.

THERE'S NO LONGER A NEED TO COMPROMISE PERFORMANCE FOR WEIGHT.

WE'VE CURED THE DILEMMA OF IMPACT MIGRATION BETWEEN COLD BORE AND SUBSEQUENT SHOTS AS BARRELS HEAT UP. WHILE CONTROLLING HEAT AND MATING PROPRIETARY CARBON AND STEEL, OUR FOCUS IS ON THE ESSENTIALS OF STRAIGHTNESS AND STIFFNESS FOR CONSISTENT PERFORMANCE, ROUND AFTER ROUND.

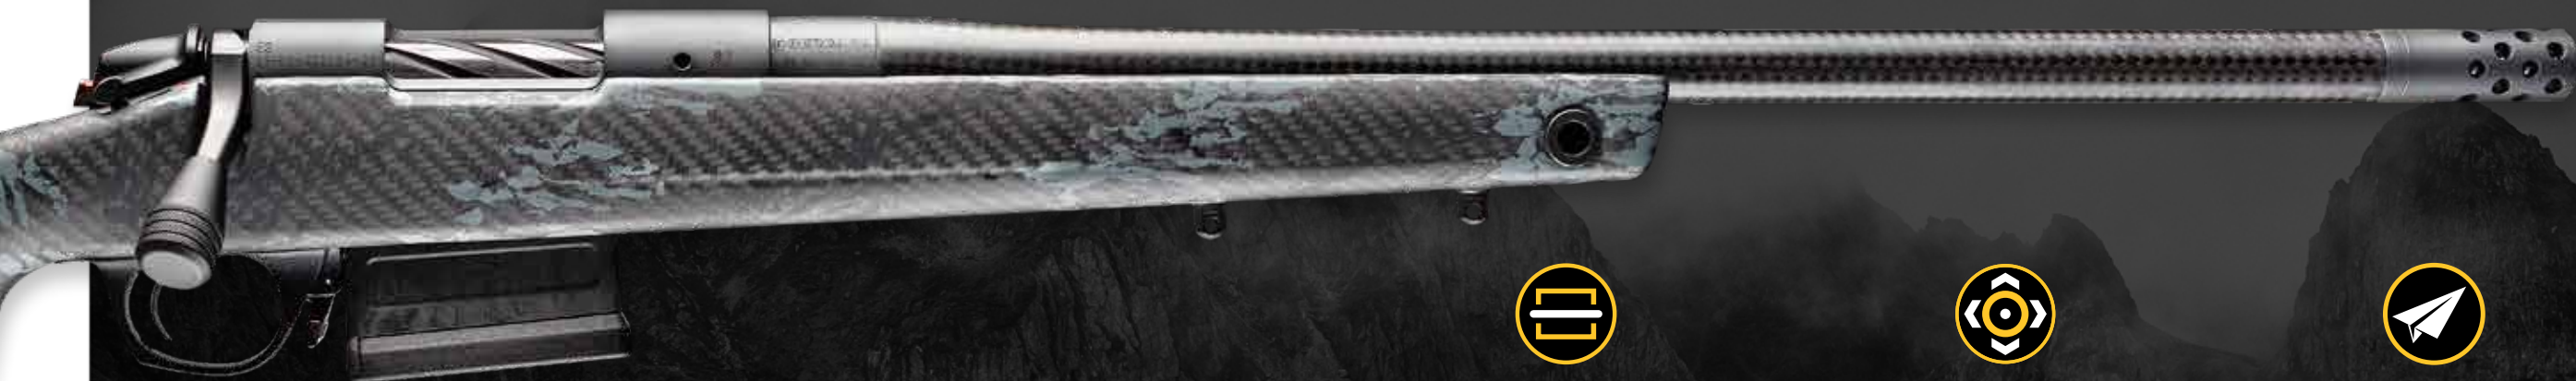

PATENTED COLDBORE TECHNOLOGY

We developed a carbon system built around moving and controlling heat. Continuous stainless steel strands were added into the carbon weave to conduct heat away from the chamber and down the barrel efficiently and consistently.

BERGARA PRECISION BARREL

Being light, straight, stiff and consistent is essential to accuracy, but there's still only one thing a bullet touches - the inside of a barrel. Bergara's reputation was built on the best drilling, honing and rifling processes on the planet.

STRAIGHTNESS

We solved the twisting and inconsistency problems of filament wound carbon barrels by optimizing the weave alignment with the barrel.

STIFFNESS

Conductive, unidirectional plies of high modulus carbon result in consistent stiffness as the barrel heats, reducing variation between shots.

LIGHTWEIGHT

Reduced barrel weight without suffering impact migration problems of traditional light profile barrels.

CURE Carbon Barrels contain a center wrap carbon weave that is designed to align directionally true to the center of the barrel's bore.

Utilizing Bergara's patented ColdBore Technology, CURE Barrels weave continuous stainless-steel strands into the carbon fiber to conduct heat away from the chamber and down the barrel efficiently and consistently.

CURE Barrels bring new levels of accuracy and performance to ultralight precision rifles.

PREMIER SERIES

BUILT BY HAND AND PAIRED WITH OUR WORLD-RENOWNED BARRELS, THE PREMIER SERIES PROVIDES NEAR CUSTOM PERFORMANCE AT PRICES THAT ARE AFFORDABLE TO SERIOUS SHOOTERS. ONLY THE BEST COMPONENTS AND FINEST CRAFTSMEN CAN BE USED TO CREATE A RIFLE LINE THIS RELIABLE AND ACCURATE.

FEATURES

- | | |
|-------------------------------|--|
| BERGARA PREMIER ACTION | <ul style="list-style-type: none"> • Premium stainless steel with Cerakote® finish • 2 locking lugs located on the front of the bolt head • Separate "floating" bolt head assures contact with lug abutments • Cone-shaped bolt nose assures smooth feeding • Sliding plate extractor • All new models feature a dual ejector • 1-piece stainless steel bolt body with threaded-in bolt handle • 90° bolt throw angle • Bolt shroud is bayonet style allowing access to the firing pin assembly. Simply twist the bolt shroud and the entire firing assembly can be removed without tools |
| BERGARA BARREL | <ul style="list-style-type: none"> • Made from premium carbon fiber or stainless steel • Carbon fiber or Cerakote® finish • Guaranteed to produce sub-MOA groups at 100 yards using quality factory ammunition |
| TRIGGER | <ul style="list-style-type: none"> • Externally adjustable TriggerTech® triggers and Frictionless Release Technology™ as standard equipment |
| SAFETY MECHANISMS | <ul style="list-style-type: none"> • The 2-position safety is part of the trigger assembly. It allows the rifle to be unloaded while in the safe position • Non-rotating gas shield behind the bolt head protects the shooter from gas and debris in the event of a case or primer rupture |

SPOTLIGHT

J.E. WILDS // ELEVATE

NEW ZEALAND - TAHR

“ We noticed animals making their way out of the thick scrub areas and rocky bluffs and we decided to make a move on a particular bull Tahr that was in a large alpine basin ahead of us. Just as we were packing up our gear to get closer to the bull, I caught movement above us.

No more than 140 yards away was a mature bull Tahr standing on a rocky outcrop. Our focus shifted instantly to this majestic bull, we crawled into position with the Bergara Elevate and Pedro pulled off a precise shot.

In the snow at the top of the mountain lay an incredible once-in-a-lifetime 14-year-old bull Tahr with an extraordinary golden mane. This was not the only success we had on this hunt, with me taking an equally impressive bull Tahr. The Bergara Elevate rifle demonstrated exceptional performance throughout, contributing to an unforgettable hunting experience in the rugged terrains of New Zealand. ”

B-14² SERIES

THE NEW B-14² CONCEPT STANDS FOR ADDING A PROPRIETARY DEVELOPMENT OF A CARBON FIBER MONOCOQUE STOCK. CREATED 100% IN CARBON FIBER, THIS STOCK HAS AN INTERNAL STRUCTURE THAT PROVIDES GREATER RIGIDITY AND STRENGTH, MAKING IT NEARLY INDESTRUCTABLE.

FEATURING THIS NEW STOCK, OUR B-14 ACTION AND OUR WELL-KNOWN BARRELS, WE'VE BLENDED ALL THE ADVANTAGES OF THE B-14 MODEL SERIES CONVERGING INTO SOMETHING UNIQUE, WHICH WE HAVE CALLED B-14 SQUARED.

FEATURES

- BERGARA B-14 ACTION**
- Spring-loaded ejector
 - Side-mounted bolt stop
 - Fluted, 4140 chromoly steel, one piece bolt body
 - 90° bolt throw angle
 - Cone-shaped bolt nose ejector - assures smooth feeding
 - Sliding plate extractor
 - Hinged floor plate or detachable magazine
 - Cerakoted® Sniper Grey

- BERGARA BARREL**
- Made with Cure™ Carbon barrel or 4140 CrMo steel
 - Sniper Grey Cerakote®
 - Sub MOA accuracy guaranteed

- TRIGGER**
- Adjustable Bergara Performance Trigger

- SAFETY MECHANISMS**
- The two position safety is part of the trigger assembly. It allows the rifle to be unloaded while in the safe position.

- STOCK**
- 100% Carbon Fiber Monocoque stock with carbon spine

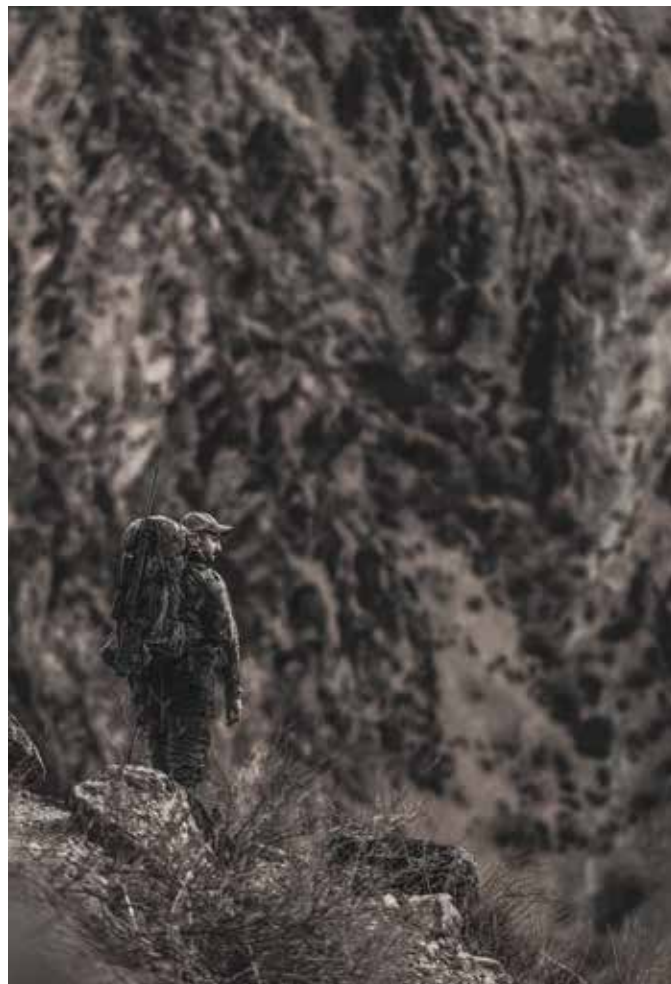

SPOTLIGHT

“ PEDRO AMPUERO // CREST CARBON

TAJIKISTAN - PAMIR IBEX

In the western part of the Pamir Mountains, right on the border between Afghanistan and Tajikistan is where we loaded a couple of donkeys to hike towards our first fly camp of the trip. The temperatures are extremely high for December, and without any signs of snow on the mountain tops the forecast predicted it was going to be a hell of a tough hunt.

The country is so steep that there is just one road at the bottom, hardly any trails for people and too dangerous to use horses, but that's the type of terrain the ibex and Markhor like. With an average of 4,500ft of daily elevation gain these mountains not only tested our physical condition, but also the mental toughness of the whole team. Rough week of hunting with a happy ending. I used the Bergara Crest Carbon in 6.5PRC, great balance of precision and solid and stable platform, but light enough to use in the mountains.

SPOTLIGHT

CHRIS TRUJILLO // SIERRA

COLORADO MULE DEER & ARIZONA COUSE DEER

“Hunting public land, I needed a rifle that kept me moving fast. Glassing off high points, prone, long distance shots were to be expected. Hunting public land comes with limited opportunities on mature bucks. The Wilderness Sierra is everything I needed to capitalize on my opportunities. The many miles hiked in snow and rain across rocky, mountain slopes in search of the right buck, all came down to settling the crosshairs, exhaling, slowly pulling the trigger and knowing my bullet would fly true.”

- Made from 410 ISI stainless steel
 - Graphite Black Cerakote® / Stainless Grey Cerakote®
 - Sub MDA accuracy guarantee

- TRIGGER**
- Adjustable Bergara Performance Trigger

- SAFETY MECHANISMS**
- The two position safety is part of the trigger assembly. It allows the rifle to be unloaded while in the safe position.

SPOTLIGHT

MARTIN BIE-ERICHSEN // EXTREME HUNTER

NORWAY - GOOSE

“ We arrived at the fields as the sun was rising and spotted the first geese of the day, grassing at the edge of a large field. My son knew the drill as he tagged along for this hunt.

We positioned ourselves under some pines. The goose is only 95 meters, a comfortable distance for such a small target. Especially when we are used to taking these shots at 180 meters or further. I rig my B14 Extreme up and warn my 2-year-old that a shot is coming. Everything felt right.

It might just be a goose, but the conversation with my son as we walked towards our kill, made it feel like we just shot the stag of our lifetime. ”

SPOTLIGHT

VICTORIA ALBIZURI // STOKE

SPAIN - CHAMOIS

“ You only get to hunt your first chamois once in your life. There are several subspecies of this animal all around Europe and are considered to be the best representation of what mountain hunting is. They are really tough animals that live in some of the most rugged terrain you can think of. The small trophy only attracts the hunters that see the beauty of the challenge beyond what they can hang on the wall. When you see them in the mountains, they transmit a feeling of freedom hard to describe. If you can get one it is because you earned it.

I knew what I was facing when I travelled to the Cantabrian mountains of Spain, trying to get the smallest subspecies of the world plus the biggest accomplishment of my life. On this trip I used the new Stoke rifle in .308WIN, with a shorter stock and length of pull it was the perfect fit to assure I would made the most of any opportunity that the mountain may give us. ”

SPOTLIGHT

CLAUDIA BREIT // BA13 THUMBHOLE

GERMANY - WILDBOAR

“ Stalking wild boars is one of the most captivating hunts I can imagine. Because then I venture outdoors in the twilight with my BA13TD and move there, sometimes for hours, through cold and darkness, for just one decisive moment. Then time stands still. I hear snorting, branches cracking, and many steps slinking over the leaf-covered ground. Suddenly, one of the smaller animals raises its head and stands broad. It's precisely this moment, the shot, and my skills that matter now. The hiss of the suppressor seals the eternal rest of the piglet. The natural stage is empty within seconds. The BA13 has fulfilled its precise task. ”

SPOTLIGHT

“ SHANE DOUGLAS
 TEAM BERGARA

The Bergara Pro Team is a great mixture of competitive shooters from different disciplines ranging from Extreme Long Range, PRS matches, NRL hunter matches, and the rapidly growing 22lr PRS/NRL style events. This grassroots style support and opportunity to hear from end users helps make sure you can depend on your rifle whether it's at a match or out in the field taking that shot on a once in a lifetime hunting trip! Team Bergara is a very unique and very different approach to helping those that we can whether it's fixing rifles at matches or offering advice or tips that we have learned along the way. If you see a Bergara jersey at a match feel free to come say hi or check out gear!
