A HISTORY OF PRECISION

With the most technically-advanced barrel manufacturing techniques, state-of-the-art machinery, and an unswerving commitment to quality, Bergara Barrels has become the barrel source of numerous top-tier gun manufacturers in both Europe and the United States. Now, with Bergara Rifles, we are producing a full line of precision rifles, engineered and built to showcase the performance capabilities of our world-class barrels.

At Bergara we believe that a precision rifle requires not only the best components, but also an assembly process that is carried out by individuals who are the best of the best at their craft. For this reason, we brought together a team of the world’s most talented and experienced rifle builders – first in the USA for our Custom Series and Premier Series, and now in Spain for our B-14 Series.

It all began several years ago when we first began with a small line of custom rifles and one top-notch craftsman, the former Production Chief & Chief Instructor for the United States Marine Corps Precision Weapons Section. As Bergara rapidly grew, we then assembled a hand-picked group of his best PWS alumni, the guys who built the rifles used by US Marines both in combat and competition all over the world.

Today, these Marines still form the core of our production team, passing their knowledge and expertise on to every new employee, and thereby bringing their own real-world experience and expertise to every Bergara rifle.

EVERY RIFLE STARTS WITH A PRECISION BARREL

**STEP 1 - BARREL STRAIGHTENING**
Each Bergara barrel begins with a straight bar of cylindrical steel, a requirement to ensure a barrel deviation of less than 4/1,000 (or .004) of an inch. Poorly straightened barrels can compound barrel runout and consequently hinder the barrel’s accuracy potential.

**STEP 2 - DEEP HOLE DRILLING**
Once the steel bar is straightened, it moves on to a four-spindle deep hole drilling machine where a specialized bit drills a perfect hole through the entire length of the bar.

**STEP 3 - BARREL HONING**
Most other barrel makers simply move from deep hole drilling to reaming, a process that leaves tool marks in the bore. Instead, Bergara uses a special honing process that utilizes diamond-tipped bits that polish the interior surface of the barrel to a mirror-like finish that is almost completely free of tool marks. The honing assures that every Bergara barrel achieves a level of accuracy on par with barrels costing much more.

**STEP 4 - BUTTON RIFLING**
A carbide rifling button is drawn through the barrel to produce the rifling grooves at the appropriate twist rate for each caliber. This produces a groove diameter deviation of less than 2/10,000 (or .0002") of an inch. It’s the same result that many gunsmiths accomplish by hand lapping.

**STEP 5 - STRESS RELIEVING**
Finally, a high-temperature heating process realigns the steel molecules ensuring that the barrel is free from any stress after the button rifling process.

OUR BARRELS MAKE THE DIFFERENCE
Think of our Premier Series as an extension of our Custom Series, but with standardized features for greater efficiencies in parts production and assembly – providing near custom performance at prices that are affordable to serious shooters.

Bergara’s premium 416 stainless steel barrels receive a proprietary honing process at our barrel-making facility in Bergara, Spain. Then, at the Bergara USA factory, the barrel receives a Cerakote™ finish and is coupled with our proprietary Bergara PREMIER action, featuring a nonrotating gas shield, crowned bolt nose, and slide plate extractor.

Premier Series rifles are built by hand and offer each shooter a wide variety of stock options. Choose from multiple carbon fiber, fiberglass, composite and precision machined chassis stock offerings. All Premier Series rifles are built around legendary Bergara barrels and feature world-famous TriggerTech® triggers among other industry-best components. All rifles are hand assembled in-house by our qualified builders to our exacting standards and precise specifications and are guaranteed to produce sub-MOA groups using factory ammunition.

### BERGARA PREMIER ACTION

- 416 Premium stainless steel barrel with Cerakote™ finish
- 2 locking lugs located on the front of the bolt head
- Conical ‘flying’ bolt head ensures contact with lug abutments
- Screw-shaped bolt nose assures smooth feeding
- Slide plate extractor
- Ejector is a spring-loaded plunger located in the bolt face
- 1-piece stainless steel bolt body with threaded-in bolt handle
- Firing assembly is bayonet style allowing quick access to the firing pin assembly. Simply twist the bolt shroud and the entire firing assembly can be removed without tools.

### BERGARA BARREL

- Made from 416 Premium stainless steel
- Cerakote™ finish
- 1.0 MOA accuracy guaranteed
- All Premier Rifles are guaranteed to produce one-MOA groups or less at 100 yards using quality factory ammunition

### TRIGGER

All Premier rifles feature TriggerTech® triggers with Frictionless Release Technology™ as standard equipment.

### SAFETY MECHANISMS

- The 2-position safety is part of the trigger assembly. It allows the rifle to be unloaded while in the safe position
- Non-rotating gas shield behind the bolt head protects the shooter from gas and debris in the event of a case or primer rupture
PREMIER SERIES

• Weight: 10 lbs-10.7 lbs
• Overall Length: 39.5"-46"
• Barrel Length: 20"-26"
• Magazine: AICS detachable
• Mag Capacity: 5 round mag provided (7 round mag: 6.5 PRC)
• Cerakote Graphite Black
• Trigger: TriggerTech
• Frictionless Release Technology™
• Barrel Taper: Medium Palma
• Muzzle: Threaded 5/8-24" with thread protector
• Stock: Fiberglass
• Scope Mount: Fits Remington 700 bases with 8 X 40 screws

CALIBER/TWIST: 6MM CREEDMOOR / 1:8, 6.5 CREEDMOOR / 1:8, 6.5 PRC / 1:8, .308 WIN / 1:10, .300 WIN MAG / 1:10, 300 PRC / 1:8

NEW CALIBER FOR 2019
Our B-14 Series brings Bergara quality and accuracy to a line of rifles that is affordable to almost any serious big-game hunter or shooter.

Built in Spain at our state-of-the-art Beneficio de Armero facility, manufacturing and assembly techniques that emphasize a high level of quality and performance that is unmatched by any rifle of its price.

B-14 Series rifles feature the world-famous Bergara barrel, complemented by our own super-smooth B-14 Action. This action features a crowned bolt nose and breech ensuring smooth feeding and a sliding plate extractor for proper alignment.

The Bergara 4140 CrMo steel barrel is finished in matte blue. Lengths and contours vary by model. Stocks are designed in various styles to ensure proper fit for every shooter.

The BMP chassis rifle features a machined aluminum chassis stock that provides stability, adjustability, and versatility. The HMR features a built-in Mini-Chassis that offers repeatable bedding and maximizes accuracy by supporting a fully floated Bergara barrel.

The Timber and Woodsman models feature Monte Carlo or American Classic styling, both in hand-graded oil-finished walnut. The Hunter and Philae models sport a lightweight synthetic stock designed to withstand the elements. Both the wood and synthetic stocks are bedded with integral pillars for stability, and are proofed against accidental discharge. All B-14 rifles are guaranteed to produce 1.0 MOA or better with quality factory ammunition.

BERGARA B-14 ACTION
- Spring-loaded ejector
- Side-mounted bolt stop
- One-piece body with two locking lugs
- 90° bolt throw angle
- Cone-shaped bolt nose ejector - assures smooth feeding
- Sliding plate extractor
- Hinged floor plate or detachable magazine

BERGARA BARREL
- Made from 4140 CrMo steel
- Matte blued finish
- 1.0 MOA accuracy guaranteed

TRIGGER
- All B-14 rifles feature Bergara Performance Trigger

SAFETY MECHANISMS
- The two position safety is part of the trigger assembly. It allows the rifle to be unloaded while in the safe position.

Bergara Custom Rifles are built by hand using the highest quality components available, including renowned Bergara barrels and Bergara Premier Action.

Bergara’s Custom Series firearms are 100 percent unique to your needs. Our expert gunsmiths will walk you through options, assess the environment in which you’ll be using your rifle, and build accordingly.

The result is your new Bergara Custom, one of the finest rifles in the world, capable of shooting sub .5 MOA groups at 100 yards.
Several years ago, our company was able to acquire an incredible piece of property in Belt, Montana with 22,000 private acres. Located just outside of Great Falls, we’ve been able to put our rifles, as well as, our own through all the rigors that the Big Sky Country affords. We are now inviting select groups to share in our little piece of paradise. We are calling it “The Bergara Academy.”

Here, in a high-altitude shooting environment unlike any other, we’ll put you through intense training sessions that will elevates your long-range shooting skills.

All courses and events are taught by professional instructors, with detailed and hands-on instructional applications specifically tailored to the desires of the group. You’ll train on a number of world-class ranges with animal silhouette targets woven into the natural environment at ranges over 1,200 yards.

Packages can also be further customized to include any number of other exciting activities, including prairie dog shoots on private grounds, world-class trout fishing, and more.

BERGARA ACADEMY

BERGARA

View course openings now at BERGARAUSA.COM

2-DAY BASIC PRECISION RIFLE / BASIC LONG RANGE HUNTER COURSE

This course teaches the student basic fundamentals in long rifle shooting at distances out to 1000 yards. Some of the topics taught will be:

- Firearms Safety
- Rifle Design and Construction
- Basic Marksmanship Fundamentals
- Scope Theory and Adjustments
- Positional Shooting
- Effects of Wind
- Range Estimation
- Care and Cleaning

3-DAY ADVANCED PRECISION RIFLE / ADVANCED LONG RANGE HUNTER COURSE

(In Addition to the 2 day course curriculum)

- Basic Ballistics
- Understanding Mils
- Range Estimation Utilizing Mils
- Rapid Bolt Manipulation Drills
- Engaging Targets out to 1200 yards

5-DAY ADVANCED PRECISION RIFLE LEVEL II / ADVANCED LONG RANGE HUNTER LEVEL II

(In Addition to the 3-day course curriculum)

- Advanced Ballistics
- Multiple Target Engagements
- Effects of Wind and Weather
- Shoter/Spotter Dialogue
- Cold-Bore Shots
- Advanced Mil Dot Training
- Engaging Targets out to 1500 yards
- Understanding Mirage
- Hold Over vs. POA/POI
- Understanding Ballistic Data
